ULTRA PRO™ SERIES BATH FANS
Protection. Serenity. Delivered by ULTRA Pro.

QUIETLY IMPROVING INDOOR AIR QUALITY FOR A HEALTHIER, MORE RELAXING EXPERIENCE.

Moisture in the bath can damage a home’s structure, and unpleasant air can spoil a home’s environment. Enjoy peace of mind knowing bathroom moisture and unpleasant air is quietly being removed by ULTRA Pro. Engineered to provide efficient and quiet operation, ULTRA Pro fans protect a home and its occupants by removing unwanted air indoors, while SEALING TIGHT to block outdoor air from flowing in.
ULTRA PRO™ FEATURES

Available in both lighted and unlighted models, ULTRA Pro fans are designed to be efficient, quiet and easy to install.

ULTRA EFFICIENT

QFlow™ Damper Technology delivers smoother airflow and superior backdraft seal
- With fan off, QFlow damper seals tightly to block outdoor air from flowing inside
- With fan on, QFlow damper lifts air out of path to reduce static pressure and noise, while maximizing airflow

ULTRA QUIET

QStream™ Sound Technology reduces sound levels and improves overall sound quality
- QStream uses a patented baffle system to smooth the flow of air, reducing noise from turbulence
- QStream Technology allows the blower to run more slowly and quietly

ULTRA QUICK INSTALLATION

ULTRA Pro fans are engineered to deliver the fastest, easiest and most universal installations
- Expandable mounting frame adjusts to fit any type of joist, I-joist or truss construction
- System works in new construction or room-side retrofit installations

ULTRALUCENT™ LED TECHNOLOGY

High-power, dual LEDs provide superior light intensity
- Dimmable LED can be adjusted to illuminate the room or provide a soft night light
- Long-life LEDs last up to 10,000 hours

ULTRA PROTECTION - Available premium radiation dampers

For multi-family applications, accessory radiation dampers RDFU and RDFUWT are available to fit any ULTRA models. Visit broan.com for application details.
